

**ORANGE COUNTY WATER DISTRICT  
DIRECTOR, DIVISION 3**

**ROGER YOH**

**OCCUPATION:** Water Quality Engineer

I am a Professional Engineer, not a politician. My commitment is to provide pure and plentiful water at the lowest possible cost.

With your support, I will work to:

Enact term limits for directors.

Increase water testing to maintain high-quality drinking water.

Hold petroleum companies accountable for MTBE contamination.

Expand our water conservation and recycling programs.

Maintain your Prop 13 property tax rate.

I hold a degree in Civil Engineering from U.C. Irvine. Professionally, I am a licensed Civil Engineer with training in water resource and construction management. I have over 13 years of public works construction and project management experience. I will employ my professional experience to ensure our precious groundwater basin is kept free of contamination. I am endorsed by the Howard Jarvis Save Prop 13 Candidate Evaluation Committee.

Southern California is in the grips of the worst drought in 500 years. As a result, Orange County's groundwater basin is dangerously over pumped. We need to take proactive steps now to correct this situation.

Please join the following elected water leaders who have endorsed my candidacy:

Orange County Water District President Denis Bilodeau.

Municipal Water District of Orange County President Brett Barbre.

I respectfully ask for your vote.
